Practical effective-rank proxy from unstructured EM-GS
Pointwise 95% trial-bootstrap intervals; no fitted decision rule
(a) Fixed SNR, P = 30, random 3–7 paths
Spearman correlation: EM proxy and true rho
SNR (dB)
N = 8
N = 16
N = 32
(b) N = 32, P = 20, L = 2, 4, ..., 16
Spearman correlation with HS-GS gain
SNR band centre (dB; band width 5 dB)
EM-based rho
True rho (diagnostic)
True L / capacity (diagnostic)
